This Key Information Memorandum (KIM) sets forth the information which a prospective investor ought to know before investing. **For further details of the Scheme/Mutual Fund, due diligence certificate by the AMC, Key personnel, Investors' rights & services, risk factors, penalties & pending litigations etc, investors should, before investment, refer to the Scheme Information Document (SID) and Statement of Additional Information (SAI) available free of cost at any of the Investor Service Centre's or distributors or from the website www.peerlessmf.co.in.**

The Scheme particulars have been prepared in accordance with Securities and Exchange Board of India (Mutual Funds) Regulations, 1996, as amended till date, and filed with Securities and Exchange Board of India (SEBI). The units being offered for public subscription have not been approved or disapproved by SEBI, nor has SEBI certified the adequacy of this KIM.

This KIM is dated 28 June 2017

Investment Objective	The investment objective of the scheme is to generate medium to long-term capital appreciation by investing predominantly in equity and equity related securities of mid cap companies. However, there is no assurance or guarantee that the investment objective of the Scheme will be achieved. The Scheme does not assure or guarantee any returns.			
Asset Allocation Pattern	Types of Instruments	Normal Allocation (% of Net Assets)		
		Minimum	Maximum	Risk Profile (Low/Medium/High)
	Equity and Equity Related Instruments of Midcap companies	65%	100%	High
	Debt and Money Market Instruments	0%	35%	Low to Medium
	<p>Midcap companies: Midcap companies are defined as companies that are mid – sized and have a market capitalization equal to or lower than that of the largest capitalized company in the CNX Midcap Index (benchmark Index) but higher than the smallest capitalized company within the index. These companies may or may not be a constituent of the benchmark Index. (Initial Public Offerings of companies, the market capitalization of which, on listing, would be estimated to be as per the above mentioned criteria, will also qualify as midcap companies.)</p> <p>This market capitalization range for midcap companies will be so determined as at the end of every calendar quarter and will be applicable for all investment decisions made during the following calendar quarter.</p> <p>In the event of the asset allocation falling outside the limits specified in the asset allocation table, the Fund Manager will rebalance the same within 30 days from the date of deviation. Details pertaining to the same are mentioned under the heading "HOW WILL THE SCHEME ALLOCATE ITS ASSETS?" in the SID.</p> <p>The Fund shall not take any leveraged position. The cumulative gross exposure through equity and debt shall not exceed 100% of the net assets of the scheme.</p> <p>The Scheme shall not invest in (i) Securitised debt, (ii) unrated instruments, (iii) Foreign Securities including securitized debt of foreign companies, (iv) Equity Linked Debentures, (v) ADRs/GDRs, (vi) Derivatives, (vii) not undertake repo/reverse repo transactions in Corporate Debt Securities.</p> <p>The Scheme retains the flexibility to invest across all the securities in the Equity and Equity related instruments, Debt and Money Market Instruments.</p> <p>In terms of SEBI Circular no. SEBI/IMD/CIR18/198647/2010 dated March 15, 2010; the mutual fund /AMC shall make investment out of the NFO proceeds only on or after the closure of the NFO period. The Scheme retains the flexibility to invest across all the securities in the Equity and Equity related instruments, Debt and Money Market Instruments.</p> <p>The Mutual Fund / AMC shall ensure that total exposure of debt schemes in a particular sector (excluding investments in Bank CDs, CBLO, G-Secs, T-Bills short term deposits of scheduled commercial banks and AAA rated securities issued by Public Financial Institutions and Public Sector Banks) shall not exceed 25% of the net assets of the scheme. For the purposes of sector exposure limits, AMFI sector classification of issuers would be considered.</p> <p>Provided that the Scheme may have an additional exposure to financial services sector (over and above the sector limit of 25%) not exceeding 15% of the net assets of the Scheme by way of increase in exposure to Housing Finance Companies (HFCs). Provided further that the additional exposure to such securities issued by HFCs are rated AA and above and these HFCs are registered with National Housing Bank (NHB) and the</p>			

	<p>total investment/ exposure in HFCs shall not exceed 25% of the net assets of the Scheme.</p> <p>The total exposure of scheme in a Group (excluding investments in securities issued by Public Sector Units, Public Financial Institutions and Public Sector Banks) shall not exceed 20% of the net assets of the scheme. Such investment limit may be extended to 25% of the net assets of the scheme with the prior approval of the Board of Trustees.</p> <p>For this purpose "Group" means a group as defined under Regulation 2(mm) of SEBI (Mutual Fund) Regulations, 1996 and shall include an entity, its subsidiaries, fellow subsidiaries, its holding company and its associates.</p> <p>The Scheme shall not invest more than 10% of its NAV in debt instruments comprising money market instruments and non-money market instruments issued by a single issuer, which are rated not below investment grade by a credit rating agency authorized to carry out such activities under the SEBI Act, 1992. Such investment limit may be extended to 12% of the NAV of the Scheme with the prior approval of the Board of Trustee and the Board of Directors of AMC.</p> <p>Provided that such limit shall not be applicable for investments in Government Securities, treasury bills and collateralized borrowing and lending obligations.</p> <p>Provided further that investment within such limit can be made in mortgaged backed securitised debt which are rated not below investment grade by a credit rating agency registered with the SEBI.</p>
<p>Investment Strategy</p>	<p>Equity Investment Strategy:</p> <p>The investment strategy of the fund will be based on the market capitalization of companies. The fund will predominantly invest in stocks of midcap companies (as defined earlier) in accordance with the investment objective and asset allocation. This market capitalization range will be so determined taking into account the capitalization range of the members of the benchmark index (CNX Midcap Index) at the end of every calendar quarter. The range once determined at quarter end will apply to all investment decisions made during the following quarter.</p> <p>Midcap companies offer higher return potential than large cap companies largely due to following reasons:</p> <ol style="list-style-type: none"> 1. Relatively less known by market participants / price discovery by market is not full. 2. Better growth prospects due to presence in a new segment/ area that is growing at a faster pace. 3. Ability to gain share due to new technology, better product / service etc. 4. Room for P/E multiples to expand if the company transitions from a midcap to large cap, etc. <p>However, these companies carry higher risk than large cap companies, particularly over the short and medium term as some of the reasons mentioned above may take longer time to manifest. Also the chances of companies failing to grow, to the next level, are higher at this stage as the businesses tend to be sub-scale. In order to reduce this risk, the Scheme will maintain a well-diversified portfolio. While the portfolio focuses primarily on a buy and hold strategy at most times, it will balance the same with a rational approach to selling when the valuations become too demanding even in the face of reasonable growth prospects in the long run.</p> <p>A bottom-up fundamental approach will be used for identifying these stocks.</p> <p>Stock identification process would include company and business analysis, industry analysis, future plans, projections, technical analysis and valuations. Based on analysis of various financial and non-financial parameters, the stocks will finally be shortlisted for portfolio construction process.</p> <p>The Fund Manager of the scheme would also take cues from the global macroeconomic trends, Government policy and monetary policy actions to decide on the asset allocation. The allocations will be within the limits defined in the asset allocation table.</p> <p>Apart from in-house research, external research is used as an important source of information. Various magazines, journals, newspapers and databases also help in the research process.</p> <p>Debt Investment Strategy:</p> <p>The Fund Manager would seek to provide risk adjusted returns by optimizing the tradeoffs between liquidity, duration (interest rate movement), and credit quality, depending on the macro- economic, technical, and market factors including future course of system liquidity, interest rates, and other fiscal and monetary variables.</p> <p>The investment strategy starts from analysis, then incorporates limits, looks at portfolio construction and rebalancing, and finally performance monitoring as a feedback loop.</p> <p>The analysis activity starts from macroeconomic analysis, including fiscal and economic factors, impact of global and local events on India's macro-economy, and finally impact of these on the fixed income market. Technical analysis is undertaken as to the likely range of movement, and deciding the timing. Market activity analysis is looked into to determine liquidity of specific securities. Credit analysis and monitoring is resorted to, and dovetailed with the other analysis to determine credit quality, and ideal spreads where specific securities ought to be trading at. This is a continuous process. All this analysis is sieved through limit filters set by the investment committee.</p> <p>Based on these results, portfolio construction and rebalancing is carried out. The performance of the portfolio is continuously monitored, and feedback is taken as to the performance of individual securities to test the assumptions behind the analysis. The assumptions are then tweaked from the learning incorporated by the feedback.</p> <p>Based on this learning, fresh analysis is carried out for portfolio rebalancing, and the process continuously iterates.</p> <p>Portfolio Construction</p> <p>The fund manager has the primary responsibility for portfolio construction based on the investment objective of the Scheme. Every investment decision taken is by keeping in mind the investment objective of the Scheme and how the security will affect the overall portfolio.</p> <p>The Scheme will maintain a well-diversified portfolio focusing on a buy and hold strategy, at most times, as investments in these midcap companies need patience for the expected returns to fructify.</p> <p>In addition, the current macro-economic / industry scenario is also monitored and analyzed to assess any impact on the sector and asset allocation decisions of the fund. Technical views which are relevant to asset allocation, if applicable will also be taken into consideration. The focus would be on long term investing driven by fundamental research. However, short-term performance will also be monitored and evaluated.</p>
<p>Risk Profile of the Scheme</p>	<p>Mutual Fund Units involve Investment risks including the possible loss of principal. Please read the SID carefully for details on risk factors before investment.</p>

	<p>Scheme specific risk factors Risks associated with Equities and Equity Related Instruments</p> <p>Equity and Equity Related Instruments by nature are volatile and prone to price fluctuations on a daily basis due to macro and micro economic factors. The value of Equity and Equity Related Instruments may fluctuate due to factors affecting the securities markets such as price volatility, volumes traded, interest rates, currency exchange rates, changes in law/policies of the Government, taxation laws, political, economic or other developments, which may have an adverse impact on individual securities, a specific sector or all sectors. Consequently, the NAV of the Units issued under the Scheme may be adversely affected.</p> <p>Equity and Equity Related Instruments listed on the stock exchange carry lower liquidity risk; however the Scheme's ability to sell these investments is limited by the overall trading volume on the stock exchanges. In certain cases, settlement periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to settlement problems could cause the Scheme to miss certain investment opportunities. Similarly, the inability to sell securities held in the Scheme's portfolio may result, at times, in potential losses to the Scheme, if there is a subsequent decline in the value of securities held in the Scheme's portfolio.</p> <p>Investments in equity and equity related instruments involve a degree of risk and investors should not invest in the Scheme unless they can afford to take the risk of losing their investment.</p> <p>The scheme also carries risks associated with investing in debt and money market securities. Investments in debt and money market instruments are subject to interest rate risk, re-investment risk, basis risk, spread risk, liquidity risk, credit risk, Liquidity Risk on account of unlisted securities, settlement risk etc.</p> <p>The Scheme may invest in securities which are not listed on the stock exchanges. These securities may be illiquid in nature and carry a higher amount of liquidity risk, in comparison to securities that are listed on the stock exchanges or offer other exit options to the investor. The liquidity and valuation of the Scheme's investments due to its holdings of unlisted securities may be affected if they have to be sold prior to the target date of disinvestment..</p>
<p>Risk Control</p>	<p>Risk and investment are two sides of the same coin of Fund Management. Effective risk management is crucial for achieving top quartile performance. Investments by the scheme shall be made as per the investment objectives of the scheme and provisions of SEBI regulations. Adequate safeguards would be incorporated in the portfolio management process. The main instrument for reducing risk is through diversification. The Fund Manager's job is to identify securities which offer higher returns with a lower level of risk.</p> <p>The fund will endeavour to manage the various risks associated with investing in equity and equity related instruments. Risk is expected to be reduced through diversification of portfolio across various sectors and market capitalizations.</p>

<p>Risks associated with Fixed Income Securities and risk mitigation measures:-</p>	
<p>Interest Rate Risk Fixed income securities such as government bonds, corporate bonds, Money Market Instruments and Derivatives run price-risk or interest-rate risk. Generally, when interest rates rise, prices of existing fixed income securities fall and when interest rates drop, such prices increase. The extent of fall or rise in the prices depends upon the coupon and maturity of the security. It also depends upon the yield level at which the security is being traded.</p>	<p>The modified duration of a portfolio is one of the means of measuring the interest rate risk of the portfolio. Higher is the modified duration, the fund stands exposed to a higher degree of interest rate risk. The Fund Manager would decide on the modified duration to be maintained for the portfolio at a particular point of time after taking into account the current scenario and the investment objective of the scheme. The portfolio duration will be decided after doing a thorough research on the general macroeconomic condition, political environment, systemic liquidity, inflationary expectations, corporate performance and other macro-economic considerations. The Investment Committee of the AMC would be monitoring the portfolios constantly and would be giving direction regarding portfolio modified duration to the Fund Manager.</p>
<p>Credit Risk This is the risk associated with the issuer of a debenture/bond or a Money Market Instrument defaulting on coupon payments or in paying back the principal amount on maturity. Even when there is no default, the price of a security may change with expected changes in the credit rating of the issuer. It is to be noted here that a Government Security is a sovereign security and is the safest. Corporate bonds carry a higher amount of credit risk than Government Securities. Within corporate bonds also there are different levels of safety and a bond rated higher by a particular rating agency is safer than a bond rated lower by the same rating agency.</p>	<p>The investment team would carry out rigorous in depth credit evaluation of the money market and debt instruments the scheme proposes to invest in. The credit evaluation will essentially be a bottom up approach and include a study of the operating environment of the issuer, the past track record as well as the future prospects of the issuer and the short term / long term financial health of the issuer. Data from external Credit Rating Agencies like CRISIL, ICRA, FITCH and CARE would be taken into account while constructing this universe. This universe would be constantly monitored by the Investment Committee which would recommend any additions/deletions from the investment universe.</p>
<p>Liquidity Risk The liquidity of a bond may change, depending on market conditions leading to changes in the liquidity premium attached to the price of the bond. At the time of selling the security, the security can become illiquid, leading to loss in value of the portfolio.</p>	<p>The Fund Manager would maintain adequate cash/cash equivalent securities to manage the day to day redemptions of the fund. Attention would be given to the historic redemption trends while deciding on the cash equivalent component of the portfolios. Also the Fund Manager and Dealer would be keeping track of various securities being traded in the market and would strive to keep the component of illiquid securities in the portfolio at a low percentage of the total portfolio.</p>

The Investment Committee of the AMC would be acting in a proactive manner to identify and analyze potential risks and act in a preventive manner to contain those risks.

<p>Risk Management Strategy</p>	<p>The various types risk management strategies are as follows:</p>	
	<p>Risk Type</p>	<p>Risk Management Strategy</p>
	<p>Quality Risk: Risk of investing in unsustainable / weak companies</p>	<p>Investment Universe to be created based on qualitative and quantitative factors so as to select good quality companies.</p>
	<p>Price Risk: Risk of overpaying for a stock</p>	<p>A detailed research to be done on a company before investing, about business fundamentals and valuations.</p>
	<p>Concentration Risk: Risk of Concentration</p>	<p>To invest across the market capitalization spectrum (though within the defined limits) and various industries.</p>
	<p>Liquidity Risk: High Impact Costs</p>	<p>To control liquidity at the portfolio construction stage.</p>
	<p>Volatility Risk: Price Volatility due to company or portfolio specific factors</p>	<p>To monitor overall portfolio volatility and control risk - stock / sector exposures as required.</p>
	<p>Event Risk: Price risk due to company, sector specific or market event</p>	<p>Understand businesses, macro-economic and global events so as to respond to events effectively and speedily.</p>

Allotment Advice (for demat holders) / Consolidated Account Statement (CAS)		
An allotment advice will be sent upon allotment of Units stating the number of Units allotted to each of the Unit holder(s) who have opted for allotment in dematerialized mode within 5 business days from the date of closure of NFO Period.		
The Units allotted will be credited to the DP account of the Unit holder as per the details provided in the application form.		
A Consolidated Account Statement (CAS) shall also be sent to the Unit holder(s) in whose folio transactions have taken place during that month, on or before 10th of the succeeding month.		
Normally no Unit certificates will be issued. However, if the applicant so desires, the AMC shall issue a non- transferable Unit certificate to the applicant within 5 business days of the receipt of request for the certificate. Unit certificate if issued must be duly discharged by the Unit holder(s) and surrendered along with the request for Redemption / Switch or any other transaction of Units covered therein.		
Rematerialization of Units will be in accordance with the provisions of SEBI (Depositories & Participants) Regulations, 1996 as may be amended from time to time.		
All units will rank pari passu with the units within the same option in the Scheme concerned as to assets, earnings and the receipt of dividend distributions, if any, as may be declared by the Trustee.		
CAS for investors having Demat account:		
<ul style="list-style-type: none"> Investors having MF investments and holding securities in Demat account shall receive a single Consolidated Account Statement (CAS) from the Depository. 		
<ul style="list-style-type: none"> Consolidation of account statement shall be done on the basis of Permanent Account Number (PAN). In case of multiple holding, it shall be PAN of the first holder and pattern of holding. For PANs which are common between depository and the AMC, the depository shall send the CAS. In other cases (i.e. PANs with no demat account and only MF units holding), the AMC/RTA shall continue to send the CAS to its unit holders as is being done presently in compliance with the Regulation 36(4) of the SEBI (Mutual Funds) Regulations. 		
<ul style="list-style-type: none"> The CAS shall be generated on a monthly basis. 		
<ul style="list-style-type: none"> If there is any transaction in any of the Demat accounts of the investor or in any of his mutual fund folios, depositories shall send the CAS within ten days from the month end. In case, there is no transaction in any of the mutual fund folios and demat accounts then CAS with holding details shall be sent to the investor on half yearly basis. 		
<ul style="list-style-type: none"> In case an investor has multiple accounts across two depositories, the depository with whom the account has been opened earlier will be the default depository. However, option shall be given to the demat account holder by the default depository to choose the depository through which the investor wishes to receive the CAS. 		
<ul style="list-style-type: none"> Where statements are presently being dispatched by email either by the Mutual Funds or by the Depositories, CAS shall be sent through email. However, where an investor does not wish to receive CAS through email, option shall be given to the investor to receive the CAS in physical form at the address registered in the Depository system. 		
<ul style="list-style-type: none"> If an investor does not wish to receive CAS, an option shall be given to the investor to indicate negative consent. 		
The dispatch of CAS by the depository would constitute compliance by the AMC/ the Fund with the requirement under Regulation 36(4) of SEBI (Mutual Funds) Regulations. The AMC reserves the right to furnish the account statement in addition to the CAS, if deemed fit in the interest of investor(s).		
Annual Account Statement		
The Mutual Fund shall provide the Account Statement to the Unit holders who have not transacted during the last six months prior to the date of generation of account statements. The account statements in such cases may be generated and issued along with the Portfolio Statement or Annual Report of the Scheme.		
Annual Report
